

## Special Edition

May 4, 2009

### **SES Introduces TIMS® 3.0**

**SES** is pleased to announce the latest in technology for the management of insurance for trust real estate and personal property assets.

When we say “the latest in technology”, that’s what we mean:

TIMS® 3.0 = Ajax + XML + Google Web Tool Kit. With Jasper reporting engine on top, you have the best technology has to offer — only from SES!

TIMS® has been a significant factor in the management of Trust Insurance Programs, providing support services for Bank clients and insurance companies that underwrite the coverage. You’ll see new functionality, improved workflow and extensive query and reporting capability. The new technology platform will enable SES to grow and expand with the changing needs of your business.

***Rollout of TIMS® 3.0 starts today and will continue over the next several weeks. Your SES Account Manager will be in contact with all current TIMS® users with new login information and a training date.***
